

Austria double-glass solar panel selling price

Overview

High-efficiency modules: The average price has risen to €0. Compared with January 2026, this represents a 13. TL;DR: A 5 kWp photovoltaic system costs €8,000–12,000 in Austria in 2026 (before subsidies). With the OeMAG feed-in tariff (7.67 ct/kWh for 13 years), federal subsidy (€250/kWp, max €5,000) and state subsidy (Styria: up to €2,000), the net cost falls to €4,000–6,000. " - SolarPower Europe Report When EK SOLAR implemented double glass modules for a Spanish agrovoltaic project: While current double glass module unit price averages \$0.27/W for 550W. Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable. The Austrian solar glass market is positioned at a critical nexus of national energy transition goals, advanced manufacturing capabilities, and evolving European regulatory frameworks. Austria targets 100% renewable electricity by 2030. OeMAG net-metering or surplus injection at OeMAG-set rates.
