

Burkina Faso s integrated base station solar power generation system

Overview

The Zina Solar Power Station is a 26. The power station is owned and was developed by a consortium comprising Amea Power, an independent power producer (IPP) based in the United Arab Emirates, and Windiga Energy, an IPP based in. The Zina Solar Power Station is a 26. Pâ is. Among these, Burkina Faso, with its abundant solar resources, continuously improving policy environment, and urgent electricity demand, is rapidly becoming an important strategic hub for the West African photovoltaic and energy storage market. The energy. The project will install about 50 MWp of PV production capacity on a large power plant near Ouagadougou, North-West Ouaga (≈ 40 MWp) connected to a 90 kV power line, and three other plants located in major regional towns - Dori, Diapaga and Gaoua. Proximity to the Kodéni high-voltage substation, the first point of interconnection with Côte d'Ivoire, enabling high availability and low grid connection costs.
