

Car solar panel quality

Overview

Below you'll find some of the most noteworthy solar-powered production cars, concepts and prototypes of recent times. A number of production cars, including the Nissan Leaf, Toyota Prius and Audi A8, have already been produced. Here's a solar-powered car you can actually buy. Dutch company Lightyear says its Lightyear 0 is the world's first long-range solar-powered production car. It's built to be light and aerodynamic. Billed as 'the car that charges itself', the Sion from German start-up Sono Motors is a solar-powered car for the budget buyer. It's expected to cost from just over £21,000, which would make it the most affordable solar-powered car. Even with the best modern solar-panel technology, a car needs to be super-efficient to travel significant distances exclusively on energy drawn from the sun. The Aptera follows. The Fisker Ocean is pitched as a mainstream premium electric SUV, but it features Fisker's SolarSky roof, which is claimed to be able to produce between 1,500 and 2,000 kWh per year.
