

Gambia clean electricity

Overview

With a national target of achieving 90% electricity access by the end of 2025, the government – supported by multilateral partners including the World Bank, European Union (EU) and Economic Community of West Africa States (ECOWAS) institutions – is rolling out climate-resilient. energy for all by 2030. This National Energy Compact provides the roadmap to accelerate the pace of implementation he SDG7 target of 2030. The process towards universal electrification is anchored on The Gambia's multi-year energy sector roadmap (2021-40) and Yiriwaa National Development Plan. vide affordable, reliable and modern energy for all by 2030. A new AfDB-backed report argues that women must become leaders, investors, technicians and entrepreneurs in renewable energy. The question now is whether policy can close the gap between ambition and implementation. The Gambia has set out an ambitious plan to achieve near-universal electricity access within the next two years, positioning regional power trade and cross-border gas developments at the centre of its energy strategy. GERMP/ECOREAP projects have connected 706 communities—raising access from 60% (2018) toward 90% projected today. Reliable electricity is supporting rural jobs and apprenticeships (around 15 trainees in some. A significant strategic project with strong substantial economic and social impacts, the recently inaugurated solar photovoltaic plant in Jambur is poised to supply electricity to approximately 18,500 households.
