

Large battery for photo storage recommendation

Overview

Vous trouverez ci-dessous les batteries pour chaque type de fabricant. Contrôlez toujours bien la compatibilité avec votre modèle ! Toutes les batteries ne sont pas toujours compatibles ! Commençons par examiner la différence entre les piles et les batteries rechargeables. Les premiers sont principalement ceux utilisés dans les télécommandes, les joysticks ou même la souris. Elles sont de moins en moins utilisées dans les appareils. Les batteries rechargeables ont une durée de vie limitée, qui dépend de la façon dont elles sont manipulées et stockées et du nombre de fois où elles. Ils coûtent généralement environ 60 €, mais on peut aussi les trouver à des prix plus élevés. C'est l'un des accessoires les plus importants à prendre en compte, car vous devez acheter un chargeur qui ne vous laissera pas en plan pendant une séance photo ou, pire.
