Overview

Solar CRM (Customer Relationship Management) software is a specialized platform designed for solar companies, installers, and renewable energy businesses to manage customer relationships throughout the entire solar project lifecycle. Why Free?

As solar market conditions continue to evolve, installers are looking for ways to build a more resilient pipeline. In this guide, we'll go over the 11 best CRMs for solar businesses to help you work through this phase of your company's growth more easily. Its focus is to help you create a list with all the leads and customers, manage your site surveys, create proposals, manage documents and photos while also keeping track of every project and contact. That even includes. Transform your raw data into insightful reports with just one click using DataCalculus. In today's rapidly evolving renewable energy landscape, solar electric power generation has emerged as a key pillar of sustainable development. For the solar energy systems power plant operator, managing. TL;DR: Solar EPCs are drowning in disconnected tools - one for design, another for proposals, a third for project tracking, and spreadsheets holding it all together.
