

# Solar curtain wall price for office building in San Diego

## Overview

15 per watt installed; a 100 kW commercial system pencils to roughly \$233k-\$315k before incentives, with final pricing dependent on roof type, electrical upgrades, and gear. The 30% federal ITC can materially lower net cost. San Diego's sunny climate makes it ideal for solar solutions, but pricing depends on several variables: System Size: Larger installations (e. Design Complexity: Custom shapes or angled panels add 10-15% to baseline costs. Material Quality: High-efficiency. How much does it cost to install solar on an office or retail building in San Diego in 2025?

San Diego averages about \$2. Choose the region where the project is located. On average, San Diego homeowners can expect: A 7.2 kW system typically costs \$17,064 upfront or \$11,945 after incentives. The good news is that solar panel costs have been decreasing, making solar more. The average cost of curtain wall installation in California ranges between \$150 to \$400 per square foot, depending on factors such as material type, system design, and labor complexity.
