

Solar micro inverter anti-reverse flow

Overview

Looking for reliable anti reverse flow inverters?

Discover top-rated solar inverters with anti-reverse protection, MPPT efficiency, and IP65 rating. Click to find the best options for your home or commercial project. But when solar generation exceeds the load consumption, the surplus power can flow back into the grid — a phenomenon called “reverse current. The Solar Anti-reverse Flow Micro Inverter by JIAJIU offers 95% efficiency, remote monitoring, and supports 800W and 1000W output power. However, photovoltaic (PV) systems introduce a new dynamic. What Is Anti-Backflow?

In a PV system, the solar modules produce direct current (DC), which is converted to alternating current (AC) by an inverter. The anti-reverse flow micro inverter comes with a RS485 interface, which can be connected to the collector to achieve the anti-reverse flow function and prevent excess power from flowing back to the grid. High-Efficiency MPPT: 99% conversion efficiency.
