

Solar power generation sold to central enterprises

Overview

According to public information, since 2024, central SOEs, including State Power Investment Corporation, State Grid Corporation, China General Nuclear Power Corporation, and Dongfang Electric Corporation, have sold multiple PV power plants or equity in PV project companies. According to public information, since 2024, central SOEs, including State Power Investment Corporation, State Grid Corporation, China General Nuclear Power Corporation, and Dongfang Electric Corporation, have sold multiple PV power plants or equity in PV project companies. You've probably heard the industry buzz – central enterprises like State Power Investment Corporation (SPIC) are suddenly selling photovoltaic assets faster than melting ice cream in July. But what's the listing price is 1 yuan! Energy central enterprises sell their Up to now, 14 central. 2024 has marked a turning point for Chinese energy and power enterprises' investments in PV power plants. Image: Unsplash In China, the once highly sought-after investment in PV projects by state-owned power and energy enterprises is quietly undergoing changes. These combined a total of 29GW solar PV, according to public information. Especially in the past six months, five central and state-owned enterprises have transferred the new energy assets of 19. As of 2024, with the continuous decline in coal prices, domestic thermal power companies are experiencing a “golden period” of profit growth.
