

Stockholm tesla solar roof

Overview

Tesla Solar Roof är ett soltak med integrerade solceller. Schedule a virtual consultation with a Tesla Advisor to learn more. Ordinary rooftop solar systems that use solar panels require bulky racks to mount the panels and unappealing conduit lines running from your panels down to your electric meter that make your home look like it belongs more in an industrial park than in a residential neighborhood. But they generate electricity from sunlight. Unlike traditional solar panels that sit on top of existing roofing materials, these are the roofing materials themselves. Each tile contains photovoltaic cells protected by tempered glass, creating a seamless. When launching the solar roof in 2016, CEO Elon Musk presented it as a critical product to accelerate solar power deployment, as it opens up the market to people who want to go solar but also need to replace their roof soon.
