

Who owns the community s solar panels

Overview

The host is the owner of the location where the community solar project will be located. The project sponsor and project host can be the same. It introduces community solar programs and their benefits, explains different ownership models, and ends with the best practices to keep in mind when starting a locally-owned community solar project. The. Homeowners, renters, businesses, and multifamily buildings can all access the benefits of solar power without installing panels on their property. Community solar projects generate renewable energy on behalf of multiple customers, who receive credits on their monthly electric bills for their share. New York City has committed to deploying 1,000 megawatts (MW) of solar citywide by 2030, enough to power 250,000 homes. Maine has 453 projects totaling 630 megawatts of operational solar energy in its net energy billing programs, excluding residential rooftop solar.
