

Why are photovoltaic panel projects covered by insurance

Overview

The primary aim of insurance for solar power systems is to protect against various types of damage, loss, and liability. Policies can be tailored to cover equipment, installation, and operational risks, reflecting the specific needs of the solar energy sector. Photovoltaic panel insurance usually covers material damage (theft, fire, weather) and, optionally, production losses. This insurance acts as a safeguard, ensuring that significant investments in solar technologies are protected from. Our PV Warranty Insurance is straightforward and effective: manufacturers protect their ability to pay excessive warranty claims on modules for a period of 25 years (up to 30 years for glass-glass modules). In the event of the manufacturer's insolvency, the policy is seamlessly transferred to a. Equipment and material selection — Solar panels are often covered by 10 to 12-year product warranties and have a lifespan of 25 years. Inverter equipment breakdown can be mitigated by having.
